Mar 2000 – Nov 2000

Transcontinental Management Systems, India as Programmer

Responsible for coding, debugging & implementation of a management support system software for a Dubai based organization. This System incorporates Accounting (Vouchers, reconciliation, trial balances, balance sheet, books, etc) Sales, Customer Related Tasks and other inter office tasks. This system also generates static web pages from customer databases for a directory service on the internet. System also incorporated in in-house operations in the development phase.

Responsible for coding, debugging & implementation of a directory service initiated by organization www.biz-finders.com

Feb 1999 – Jan 2000

Focus Information System Ltd., India as Jr. Programmer & Field Engineer

Programmer in team who was responsible for coding, debugging & maintenance of a system outsourced by the company to Haryana Warehouse Corporation. The system is developed as a part of facilities management provided to Haryana Warehousing Corporation. The system is implemented across 103 centers, 9 District Offices online to Head Office. The system looks after the complete warehouse operations including Receipt, Issue, Stacking of goods, Capacity Utilization, Technical Inspection of Grains, Procurement, General Accounting, Loan Accounting at Warehouse level and at District level it covers district accounting and clubbed reports of the warehouse under that district and head office operations, district level and warehouse level reports at Head office level.

- Being an Enterprise Solution, to manage the Project in a systematic manner, the whole development process was brought under Version Control using Visual SourceSafe Automation from within Visual Basic 6.0. Features Used :

For Oracle 8.0 Server at the Backend:

• Triggers & Stored Procedures

• Backup & Replication Features of Oracle.

For Visual Basic:

• ActiveX Data Objects

• Win32 API Routines

Nov 1996 – May 1998

Punjab Wireless Systems Limited, India as Technical Assistant

Responsible for layout of Networking for Inter Office Communication & VSAT Department. Installations of VHF Receivers. Inter Office Hardware & Networking Maintenance & Inventory Reports in MSOffice 97 Suite.Intense Training of NT Platform

Other Fields Experience

- Owns a transport loading cum passenger vehicle - Mahindra Pickup and e-Riksha that I ran with success for 6 months on rent with my supervision.
- Converted my transport vehicle for 6 months to a food point and ran with success.
- Stock and CFD trading on FBS and Zerodha for a few months and learnt.
- Taught part time tuitions in computers and 10th standard students.
- Learned CCTV installation.
- Also worked in the construction business with a small amount of investment.
- Have done repair and sale of electrical appliances for some months.

Strengths

Good learner, Self starter, Problem solver

Weakness

Dislike, Total-Boycott & No- trust mainly on Neighbours, Dislike non technical diplomacy

Hobbies

Surfing the Internet, Driving to new places, Health & Sports.

Points to Note

1. I won't be able to do and recommend phone communication initially, Please do all initial communication via email or whatsapp messenger. And phone communication only when some rounds of the online interview process are on positive notes via video conferencing software like zoom,gmeet,skype, etc.
2. Shift preferences based on concentration level as per India time zone - Night shift (Best concentration), Afternoon/Evening shift (better concentration), Morning shift (chances of less concentration due to disturbances)
3. Remuneration expectations depends of terms of association (long term, project based, small term), type of association (permanent job, part time job, hourly job, freelancer work)
4. Some of the WFH in my freelancing journey I won't discuss their name just show the code and project specs.
5. Proof of education certificates can be provided in gray color online.
6. For On-site jobs I will recommend that a WFH should be for one month initially which is the best way to be familiar to each other before relocation.
7. Links may not work as specified in the resume because of old projects but I can show the code.
8. If I have to appear for an interview which is 100 miles away from my current location then I should be paid travel expenses.
9. Permanent invites won't be accepted unless something positive because of a bad experience where people invited and I added. Later they became negative and got my freelancer account suspended. So any invite even on social platforms won't be accepted initially till the job or project is in hand.   Quote in support to this - " Treachery has existed as long as there's been warfare, and there's always been a few people that you couldn't trust. - Jim N. Mattis "
10. My preferred regions of relocation in India - Dehradun / Goa / Himachal / Bombay

Dheeraj Bhatia
